smartphones and
tablets

18,97 €

Special SAT 0.70mm
PET pick, high friction
and resistance

1,25 €

Smartphones and PC
repair tool case

35,92 €

Step 1 - Back case

We apply heat to the back casing and with the help of a plastic spectrum let's take off all the edges of the casing.

Step 2 - Fingerprint reader flex

We remove the Phillips screw (PH # 00) that holds the shield that protects the battery connector.

Step 3 - Intermediate housing

Remove the 15 Phillips screws (PH # 00) that hold the intermediate housing and with the help of a plastic prong we uncouple the housing.

Step 4 - Battery

We disconnect the flex from the battery, apply heat to the battery but not directly, we will apply heat to the area of ??the screen at the height of the battery, and with a tool sufficiently thin we will remove the battery that we are going to replace.
