69,61 €

Opening tool
Smartphone, tablet

2,19 €

Pinza antiestática
ESD redondeada

3,07 €

Special SAT 0.70mm
PET pick, high friction
and resistance

1,25 €

Step 1 - Remove back cover

We started by heating the back cover at about 60 ° C for about 1 minute.

With it hot, we introduce a flat tool between it and the frame. Sliding it around the contour will get it off.

Step 2 - Front camera

Unplug the upper inner shell and then disconnect the camera from the base plate and disengage it.
