6,96 €

Opening tool Smartphone, tablet

2,19 €

Anti-static tweezer tips VETUS ESD-249

4,74 €

Special SAT 0.70mm PET pick, high friction and resistance

1,25 €

Step 1 - Remove back casing

To remove the back shell, we simply introduce a prong between it and the frame to release the notches that hold it.

Step 2 - Remove battery

Remove the battery and the twelve Philips screws (PH # 00) that hold the housing.

Step 3 - Remove intermediate housing

Unfasten the intermediate housing with the help of an opening tool.

Step 4 - Front camera

All you have to do is unplug and remove the camera from the motherboard.
