Click on a tool for visit the website.

Opening tool
Smartphone, tablet

2,19 €

Pinza antiestática
ESD redondeada

3,06 €

Smartphones and PC
repair tool case

35,92 €

Step 1 - Remove back cover and battery

We will start by removing the back cover. To do this, using an opening tool, we will leverage to release it. Then we will remove the battery with the tool or directly with the hands.

Step 2 - Intermediate housing

We remove the thirteen Phillips screws (PH # 00) that hold the casing and then remove it by levering it like in the back cover.

Step 3 - Front camera

We remove the adhesive that covers the connector of the camera, we disconnect it and we take it off the chassis.
