welder for repairs

15,59 €

Set of professional
tools for opening
smartphones and
tablets

18,97 €

Special SAT 0.75mm
high friction PVC pick

1,07 €

Step 1 - Back case

We apply heat to the back shell, and with the help of a fine tool we will open a hole to introduce a thicker plastic spike to be able to detach the shell on all edges.

Step 2 - Battery disconnection

Remove the Phillips screw (PH # 00) that holds the shield that covers the battery connector, and disconnect the battery to avoid possible damage.

Step 3 - Intermediate housing

We extract the nine Phillips screws (PH # 00) that hold the intermediate housing and unhook it.

Step 4 - Frontal camera

We disconnect and remove the front camera that we have to replace.
