Step 1 - Remove back cover

With a flat tool we will lever to unhook the chassis housing.

Step 2 - Remove battery

To remove the battery, we will pry with a flat tool or directly with your hands.

Step 3 - Remove internal casing

Remove the twelve screws that hold the intermediate casing and unhook it from the chassis.

Step 4 - Side push buttons

To finish, we disconnect the flex from the motherboard and take it off the chassis.
