Set of professional
tools for opening
smartphones and
tablets

18,97 €

6-in-1 screwdriver, K-
8107 with different
heads, in blister

7,52 €

Step 1 - SIM tray

With the help of a SIM removal tool we remove the SIM tray.

Step 2 - Back case

Unscrew the two Pentalobe screws (TS1) that hold the rear housing.

Once the screws are released, we introduce an opening tool between the housing and the phone, making the whole contour we release the back cover to remove it completely.

Step 3 - Upper internal casing

We take off the fingerprint reader that is attached to the housing.

Unscrew the Phillips screws (PH # 00) that hold the casing and remove it.

Step 4 - Rear camera 8Mpx

We disconnected the rear camera, took it off and removed it.
